

“As a professional soccer player I am constantly managing aches, strains and pain. Since Dr. Santiago has started treating my hamstring in jury with the Litecure laser, my recovery time has been really fast. I was skeptical at first, my time is valuable and I cannot be messing with some new fangled toy. However, the results were truly dramatic. I like the fact that it is non invasive and drug free. It has helped me get back in the game post injury in record time and allowed me to perform at my peak, as I am typically pain free after one or two sessions with the laser. I would recommend this treatment to any athlete looking to optimize healing time. The Litecure laser is my go to modality for serious pain relief.”
